

CLIENT REQUIREMENT DOCUMENT

1. Project Overview

The client is an education consultancy agency that helps students choose the right college based on course preference, fee structure, location, and career goals. They require a fully responsive website where students can submit inquiries and the agency can manage them through an Admin Dashboard.

2. Target Users

Students seeking admission in BTech, MBA, MCA, Diploma, and other professional courses.

3. Website Functional Requirements

Home Page with introduction, services overview, and partner colleges highlights.

Get Inquiry Form including fields for Name, Mobile, Email, Course, Location, Budget, and Message. After submission, data must be stored in MySQL and an email notification sent to admin.

4. Company Details Section

About Us, Team Members, Past Work, Partner Colleges, and Tie-ups information.

5. Blog and Media Section

Blog articles, image gallery, and video section manageable from Admin Panel.

6. Admin Panel Features

View, edit, delete, and add student inquiries. Upload blogs, images, and videos. All changes should reflect instantly on the live website.

7. Email Notification System

Automatic email to admin on every new inquiry.

8. Technology Stack

Frontend: HTML, CSS, JavaScript. Backend: PHP. Database: MySQL.

9. Website Type

Static + Dynamic mixed type and fully responsive.

10. Hosting and Domain

The client has already purchased domain and hosting.
